

PROFILE

Turning ideas into impactful software is my craft. As a Software Engineering student, I blend creativity with precision to build engaging applications and mobile solutions. From front to back end, I code with purpose, creating innovative software that connects people and drives meaningful change. Every great idea deserves to take shape, and I'm here to help make it happen.

SOFTWARE DEVELOPER & UI/UX DESIGNER

IVAN BUDANOV

WORK EXPERIENCE

RUSTA | 2020-2023

Sales Associate (Seasonal)

- Handled a variety of customer service tasks, including sales, cashier operations, and department maintenance, ensuring a positive shopping experience.
- Managed responsibilities in cash handling, the garden area, and warehouse tasks, supporting store organization and efficiency.
- Gained practical experience in teamwork, warehouse operations, and customer relations.

FINNISH DEFENCE FORCES | 2022-2023

Communications Conscript (Part-time)

- Created and managed content for the Dragoons Band's social media, including photography, video editing, and visual design.
- Produced visuals for advertising, social media, and print materials such as flyers, posters, and magazines.
- Developed skills in social media marketing, content creation, and multimedia design, enhancing the band's online presence.

EDUCATION

METROPOLIA, UNIVERSITY OF APPLIED SCIENCES

Information Technology Engineer, Bachelor's Degree | 2023 - Present

LAPPEENRANTA LYSEO, UPPER SECONDARY SCHOOL

2019 - 2022

PROJECTS

JOBSCOUT | 2024

Developed a full-stack job search platform to simplify job hunting by aggregating live job postings for registered users. Key features include real-time job listings, secure user authentication with JWT, and scheduled scraper automation for continuous updates. Built using the MERN stack, with responsive design using React, TailwindCSS, and Framer Motion for a seamless user experience.

QRAI | 2024

Created an AI-powered app in React Native with Expo and NativeWind (TailwindCSS) to generate custom-designed, scannable QR codes tailored for branding and marketing applications.
